On-demand employment support

Managing SafeWork issues and incidents

WHS eLearning staff training

Preparation of WHS documents and policies

Development of a WHS Risk framework

WHS Management System risk assessment

Preparation of WHS tools and registers

How We Work With You

- 1 In the first month, we will conduct an initial WHS assessment and advise you on how your business is performing from a Health and Safety point of view.
- 2 Once we have identified any gaps, we will develop a WHS risk management and compliance framework and prepare all of your WHS documents, policies and tools.
- 3 Our WHS team are then on-hand to assist you whenever you need them, answer all of your health and safety questions and provide ongoing training and compliance management.

This advisory service is only available to LegalVision members. LegalVision is unable to prepare, review or sign off on manual safety procedures (including safe work method statements), provide onsite inspections or audits, nor provide advice as to the physical safety risks in your workplace.
